

ALBARAA ALNAHARI

Software Engineering Student

albaraa.a.alnahari@gmail.com | +966557727210 | Saudi Arabia | LinkedIn | GitHub

SUMMARY

Software Engineering student with experience in full-stack development, AI-enabled products, user research, and project execution. Built web and mobile applications, integrated AI APIs, and translated user needs into practical product features. Skilled in Java, C++, Python, React, Next.js, SQL, and data analysis, with leadership experience across tech programs and student communities.

PROFESSIONAL EXPERIENCE

- Soum Company, Product Management Intern**

11/2025 – 03/2026 | Jeddah, Saudi Arabia

 - Supported end-to-end development of a product feature across research, design, testing, and execution.
 - Conducted user research with **100+ users**, translating pain points into product requirements, user stories, and **3+ use cases**.
 - Performed competitor analysis and **4+ market benchmarks** to identify product opportunities and support feature decisions.
 - Tested and iterated on product workflows, improving usability, issue detection, and data-driven performance tracking.
- Smart Method Company, Robotics Engineering Intern**

06/2025 – 12/2025 | Jeddah, Saudi Arabia

 - Completed a full Robotics Engineer Certification with hands-on work in AI robotics, 3D modeling, and automation.
 - Developed an AI-powered robotic arm and AI chatbot prototype while solving on-site factory challenges.
- Al-Aqsa Private Schools Institute (Seasonal), Summer Program Director & Supervisor**

2023 – 2025 | Jeddah, Saudi Arabia

 - Promoted from Supervisor to Director after leading two consecutive summer programs.
 - Managed **8+ teachers** and **70+ students** across **5 learning levels**, increasing enrollment by **30%** through program development and parent engagement.

EDUCATION

Bachelor of Software Engineering, University of Jeddah
Expected Graduation: 2027 | Jeddah, Saudi Arabia

PROJECTS

- DocuPilot — AI Business Operations Platform | 1st Place, AI Innovation Bootcamp,**

05/2026 – Present

Next.js, TypeScript, Tailwind CSS, Supabase, Gemini API, Qwen API, Zod

 - Built a full-stack AI SaaS platform that converts business documents and client requests into structured workflows, risks, approvals, and project decisions.
 - Developed AI workflows for feasibility analysis, business blueprint generation, contract extraction, invoice approval, scope-change detection, and document-based Q&A.
 - Integrated Supabase with Zod-validated AI JSON outputs and designed an operations dashboard for project health, payments, obligations, and urgent alerts.

Live: docupilot.site
- Slide-Mind Flashcard Generator — Java**

08/2025 – 10/2025

 - Built a modular Java application that uses AI and API integration to generate interactive learning flashcards.
 - Implemented file I/O and an extensible architecture to support future feature expansion.
- Sanadk Accessibility App | UX/UI Design,**

02/2026 – 05/2026

Figma, Google Forms, User Research, Prototyping

 - Analyzed **77 survey responses** to identify accessibility needs for visually impaired and wheelchair users.
 - Designed mobile prototypes and user-centered task flows for product scanning, accessible navigation, and voice-assisted interaction.
- TechPath — Full Stack Web Application,**

04/2026 – 05/2026

React.js, JavaScript, Tailwind CSS, Anthropic API (Claude AI), Responsive Design

 - Built an AI-powered roadmap generator that personalizes learning timelines, milestones, and resources based on user goals and availability.
 - Integrated Anthropic Claude API to generate adaptive learning roadmaps and educational recommendations.
 - Developed responsive front-end components for roadmap visualization, progress tracking, assessments, and interactive learning workflows.

GitHub

ORGANISATIONS

- PreHack, Admin & Voice Host**

05/2024 – Present

 - Organized tech events and live sessions reaching **650+ participants/attendees**, including Hackwave at University of Jeddah.
 - Managed AI and Cybersecurity bootcamps supporting **150+ participants** in hackathon preparation.
- University of Jeddah, Leadership & Tech Activities**

03/2024 – Present

 - Revived the Drone Club by establishing **5 committees** and recruiting **65+ active members**.
 - Managed a Google x GDSC Data Science Bootcamp with **5,000+ participants** and organized **10+ tech events/workshops**.

SKILLS

Programming Python, SQL, MySQL, Java, C++	Web HTML, CSS, TypeScript, JavaScript	Data & AI Pandas, NumPy, Data Analysis, OpenCV, AI APIs	Frameworks & Libraries React, Next.js, Tailwind CSS, Flutter
Tools Git, GitHub, VS Code, PyCharm, Supabase, Figma	Soft Skills Analytical Thinking, Communication, Leadership		

LANGUAGES

- Arabic — Native/Bilingual
- English — Proficient
